

# Lounge Chair

SET YOURSELF FREE

**The Lounge Chair** is a place to rest, to think, to relax. The frame of the Lounge Chair consists visually only of one long steel tube, bent in generous, dynamic lines for ultimate comfort.

**The Lounge Chair** designed 1932 meets PH vision that there should be comfortable furniture shapes that were simpler to manufacture in steel than in wood. The generously upholstered seat and ergonomic line of the lounge chair guarantees comfort and superb back support.

**The Lounge Chair** comes with steel tubes in a chrome and with a upholstery in the classy aniline leather or in the warm and comfortable Hallingdal fabric.
